

TRIFUSION®

TRIFUSION® has rightfully become the standard by which all other finishes are assessed. This proven high quality contact surface finish sets the benchmark for use in the more demanding areas of industrial effluent treatment and sludge digestion. An additional protective layer, together with the zero discontinuity finish tested at an exacting 1100 Volts, provides exceptional security and continuous protection.

- Application: pH 2-11
- Type: 3 coat, 2 fire
- Thickness: 280-460 microns
- Test Regime: Zero discontinuities at 1100V
- Exceeds quality requirements of EEA 7.20
- Meets or exceeds the glass coating requirements of AWWA D103-09 – Section 12.4
- Meets or exceeds quality requirements of EN ISO 28765:2011*
